Location: Available across Morocco

Education

Master in Artificial Intelligence and Data Science — Oct 2023 – July 2025
Faculty of Sciences and Technologies — Tangier, Morocco

Bachelor in Computer Science and Mathematics — Oct 2019 – July 2023
Faculty multi-disciplinary — Larache, Morocco

Experience

AI / Digitalization Engineer Intern, KOSTAL Group – Tangier — Jan 2026 - Present

- Analyzed production data to identify bottlenecks, defect patterns, and performance drifts
- Explored AI-driven approaches for anomaly detection, predictive insights, or intelligent process monitoring using production data.
- Developed a digital platform for Project Launch Management, improving project tracking, reporting, workflow visibility, and collaboration across teams.
- build robust Data Pipeline to extract and transform noisy data into structured data, from different sources

AI Engineer Intern, Bid2Win – Remote - Part-Time — Dec 2025 - May 2026

- Developing an AI-powered platform to automate tender analysis, reducing manual document review time and improving filtering efficiency.
- Built automated pipelines to scrape, ingest, clean, transform, chunk, and index unstructured tender documents from multiple sources.
- Implemented a RAG-based feature extraction pipeline to automate insight extraction from tender documents for scoring and recommendation.

AI Engineer Intern, High Commission for Planning – Remote — Sept 2025 – Dec 2025

- Designed and developed an AI-powered platform to automate the documentation and management of statistical processes based on the **GSBPM** framework.
- Engineered a document-ingestion pipeline to collect, process, and index files from multiple sources.
- Developed a RAG engine using **HyDE** prompting and semantic retrieval to generate structured, GSBPM-compliant documentation.
- Reduced statistical-process documentation time from days to hours through automated information extraction and report-generation workflows.

AI Engineer Intern, TNA Consulting – Casablanca — Feb 2025 – July 2025

- Developed an AI-powered platform that enables financial institutions to search, interpret, and leverage African central-bank publications and regulatory documents.
- Built a scalable document-processing pipeline for scraping, extracting, cleaning, chunking, embedding, and indexing financial documents.
- Implemented a RAG-based chatbot that provides answers grounded in retrieved central-bank publications.
- Improved the accessibility and searchability of financial regulatory information, reducing manual research effort for users.

Research Assistant, Faculty of Poly-disciplinary – Larache — March 2023 – June 2023

- Developed an optimization system to improve the consistency of Analytic Hierarchy Process (AHP) pairwise comparison matrices using Genetic Algorithms (GA) and Particle Swarm Optimization (PSO).
- Built a Django web application for automated AHP matrix generation and validation, simplifying the decision-making workflow.
- Co-authored **three** research papers with **Dr. Chakir Tajani**: Paper 1 – Paper 2 – Paper 3

Languages

Arabic: Native proficiency | **English:** Professional (B2) | **French:** Professional (B2)

Certifications

Associate Data Scientist in Python – DataCamp
Associate AI Engineer for Data Scientist – DataCamp
Microsoft Azure Fundamentals – DataCamp
Associate Data Engineer – DataCamp

Skills

- **Programming Languages:** Python, Java, JavaScript, SQL, C, Solidity, Bash
- **Machine Learning & Generative AI :** Scikit-learn, TensorFlow, Keras, PyTorch, XGBoost, MLFlow, LangChain, LangGraph, n8n, CrewAI, Agno, RAG, Prompt Engineering, AI Agents, Fine-Tuning, Ollama, OpenAI
- **Web Development:** HTML, CSS, Tailwind, JavaScript, React/NextJS, Django, Flask, FastAPI, Streamlit
- **Libraries & Tools:** NumPy, Pandas, Matplotlib, Seaborn, Plotly, OpenCV, Selenium.
- **Big Data & Distributed Systems:** Apache Spark, Apache Airflow, Apache Kafka, RabbitMQ
- **Databases:** MySQL, SQL Server, PostgreSQL, MongoDB, Chroma, Qdrant, Weaviate, SnowFlake, Redis
- **DevOps & Tools:** Linux, Git/GitHub, CI/CD, Azure, Docker/Docker-Compose, Power BI, Postman
- **Soft Skills:** Analytical & Problem-solving Mindset, Fast learning, Teamwork and collaboration

Projects

ChatPDF – Chat with PDF Locally [GitHub Repo]

- Developed a local AI assistant that enables users to ask natural-language questions about PDF documents.
- Designed an end-to-end RAG pipeline covering PDF parsing, document chunking, embedding generation, vector retrieval, and LLM-based answer generation.
- Tools Used: Python, Streamlit, LangChain, Ollama, Sambanova API, ChromaDB, Marker (Document Parser)

AI Scraper [GitHub Repo]

- Developed an AI-powered web-scraping application to extract, clean, and structure data from static & dynamic websites using local or cloud-based LLMs.
- Integrated LLM-based extraction to convert unstructured web content into structured datasets for analysis and downstream AI workflows.
- Tools Used: Python, Selenium, Crawl4AI, Streamlit, Ollama, SambaNova API, Pandas

Real-time Twitter Sentiment Analysis [GitHub Repo]

- Developed a streaming data pipeline using Kafka and Spark Streaming to process and classify tweets in real time.
- Built live analytics dashboards to visualize sentiment trends and system performance metrics.
- Tools Used: PySpark, Kafka, Docker, Django, MongoDB, ChartJS

Text-to-SQL AI Assistant [GitHub Repo]

- Developed an AI agent that translates natural-language questions into SQL queries for database exploration and analysis.
- Built an interactive interface to execute generated SQL queries and display results to users.
- Applied LLM orchestration to connect natural-language inputs, database schemas, SQL generation, and result visualization.
- Tools Used: Python, LangGraph, Streamlit, SQL, Pandas.

Full-Stack Web Applications

- Developed multiple full-stack web applications (authentication, REST APIs, database design, and responsive UIs using Python and JS Frameworks) including : Marketplace Website - Chat With LLM - Blog Website - Note App - Real-Time Chat App
